May 2021 - Luncheon Webinar - Creating an Environment for Wholeness to make space for Creativity

People are their most creative when they feel safe to bring their whole self forward. In our agile environments, we are looking for that level of investment so that individuals can flourish and our customers can benefit from what comes forth. How do we make space for courageous creativity in our workplaces? What does it take to really be a place that values individuals and interactions over processes and tools?
